ICT Standard

ICT Standard Audit provides an organization /company with the needed assurance that their Information systems are compliant with IFGICT's best practice ICT guidelines.

ICT audit objectives focus on substantiating that the internal controls exist and are functioning as expected to minimize business risk along with given KPIs.

These audit objectives include assuring compliance with legal and regulatory requirements, as well as the confidentiality, integrity, and availability.

www.ifgict.org

Why ICT Standard?

The ICT Audit is conducted as part of the wider accreditation process by the IFGICT. The aim of an ICT audit is to review the information system architecture (including the KPI documentations), assess the actual implementation and effectiveness of controls for a system and to report on any observed operational risks relating to the operation of the system to the certification.

ACCREDITATION & RECOGNITION

The certification process is very effortless and direct :

Verify Membership / Certificate

- ✓ Training provider decides what courses want to submit for validation
- ✓ Training provider submit course material and exam model
- ✓ IFGICT Technical committee will audit and evaluate course content
- ✓ IFGICT will approve and recognize the course content
- ✓ IFGICT will provide a validation registration number for **online verification** for each candidate with IFGICT Certification

RESOURCES OVERVIEW

The Certification Authority of IFGICT will receive the compliance Report from the president of the committee (Audit Committee) and make a judgment based on the findings of the review to determine if any residual risk is present in the manner in which the controls are operated. The (Audit Committee) with client should provide detailed information regarding the operation of controls if they are found to be ineffective or partially effective to enable the Certification Authority to make this assessment. Obtaining certification for an ICT Audit provides an organization /company with the needed assurance that their Information systems are compliant with IFGICT's best practice ICT guidelines.
