The ages of integration approach

Mistake of being independent
NOKIA

Time scale of advancement

One decade far to apply the hyperloops 2030s

TWO decades far to apply the HoloTech
2030 - 2035s

TWO decades far to apply the VLSI USLI over
healthcare & human body
2030 - 2035s

TWO decades far to apply the Quantum Tech
2030 - 2040s

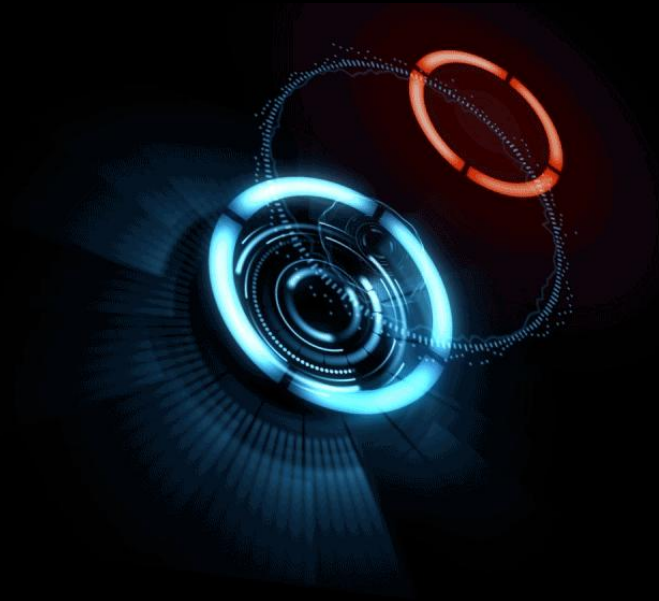

Multi-Internet Access (Earth and from Space)

TWO decades far to apply the Quantum Tech
2030 - 2040s

The first, most linear solution, is quantum. The second, more radical, is consciousness itself. **Quantum** provides a good potential for the **evolution beyond digital** because it **is not digital** as we know it, but can be seen on a continuum of development from **digital**. In the quantum world

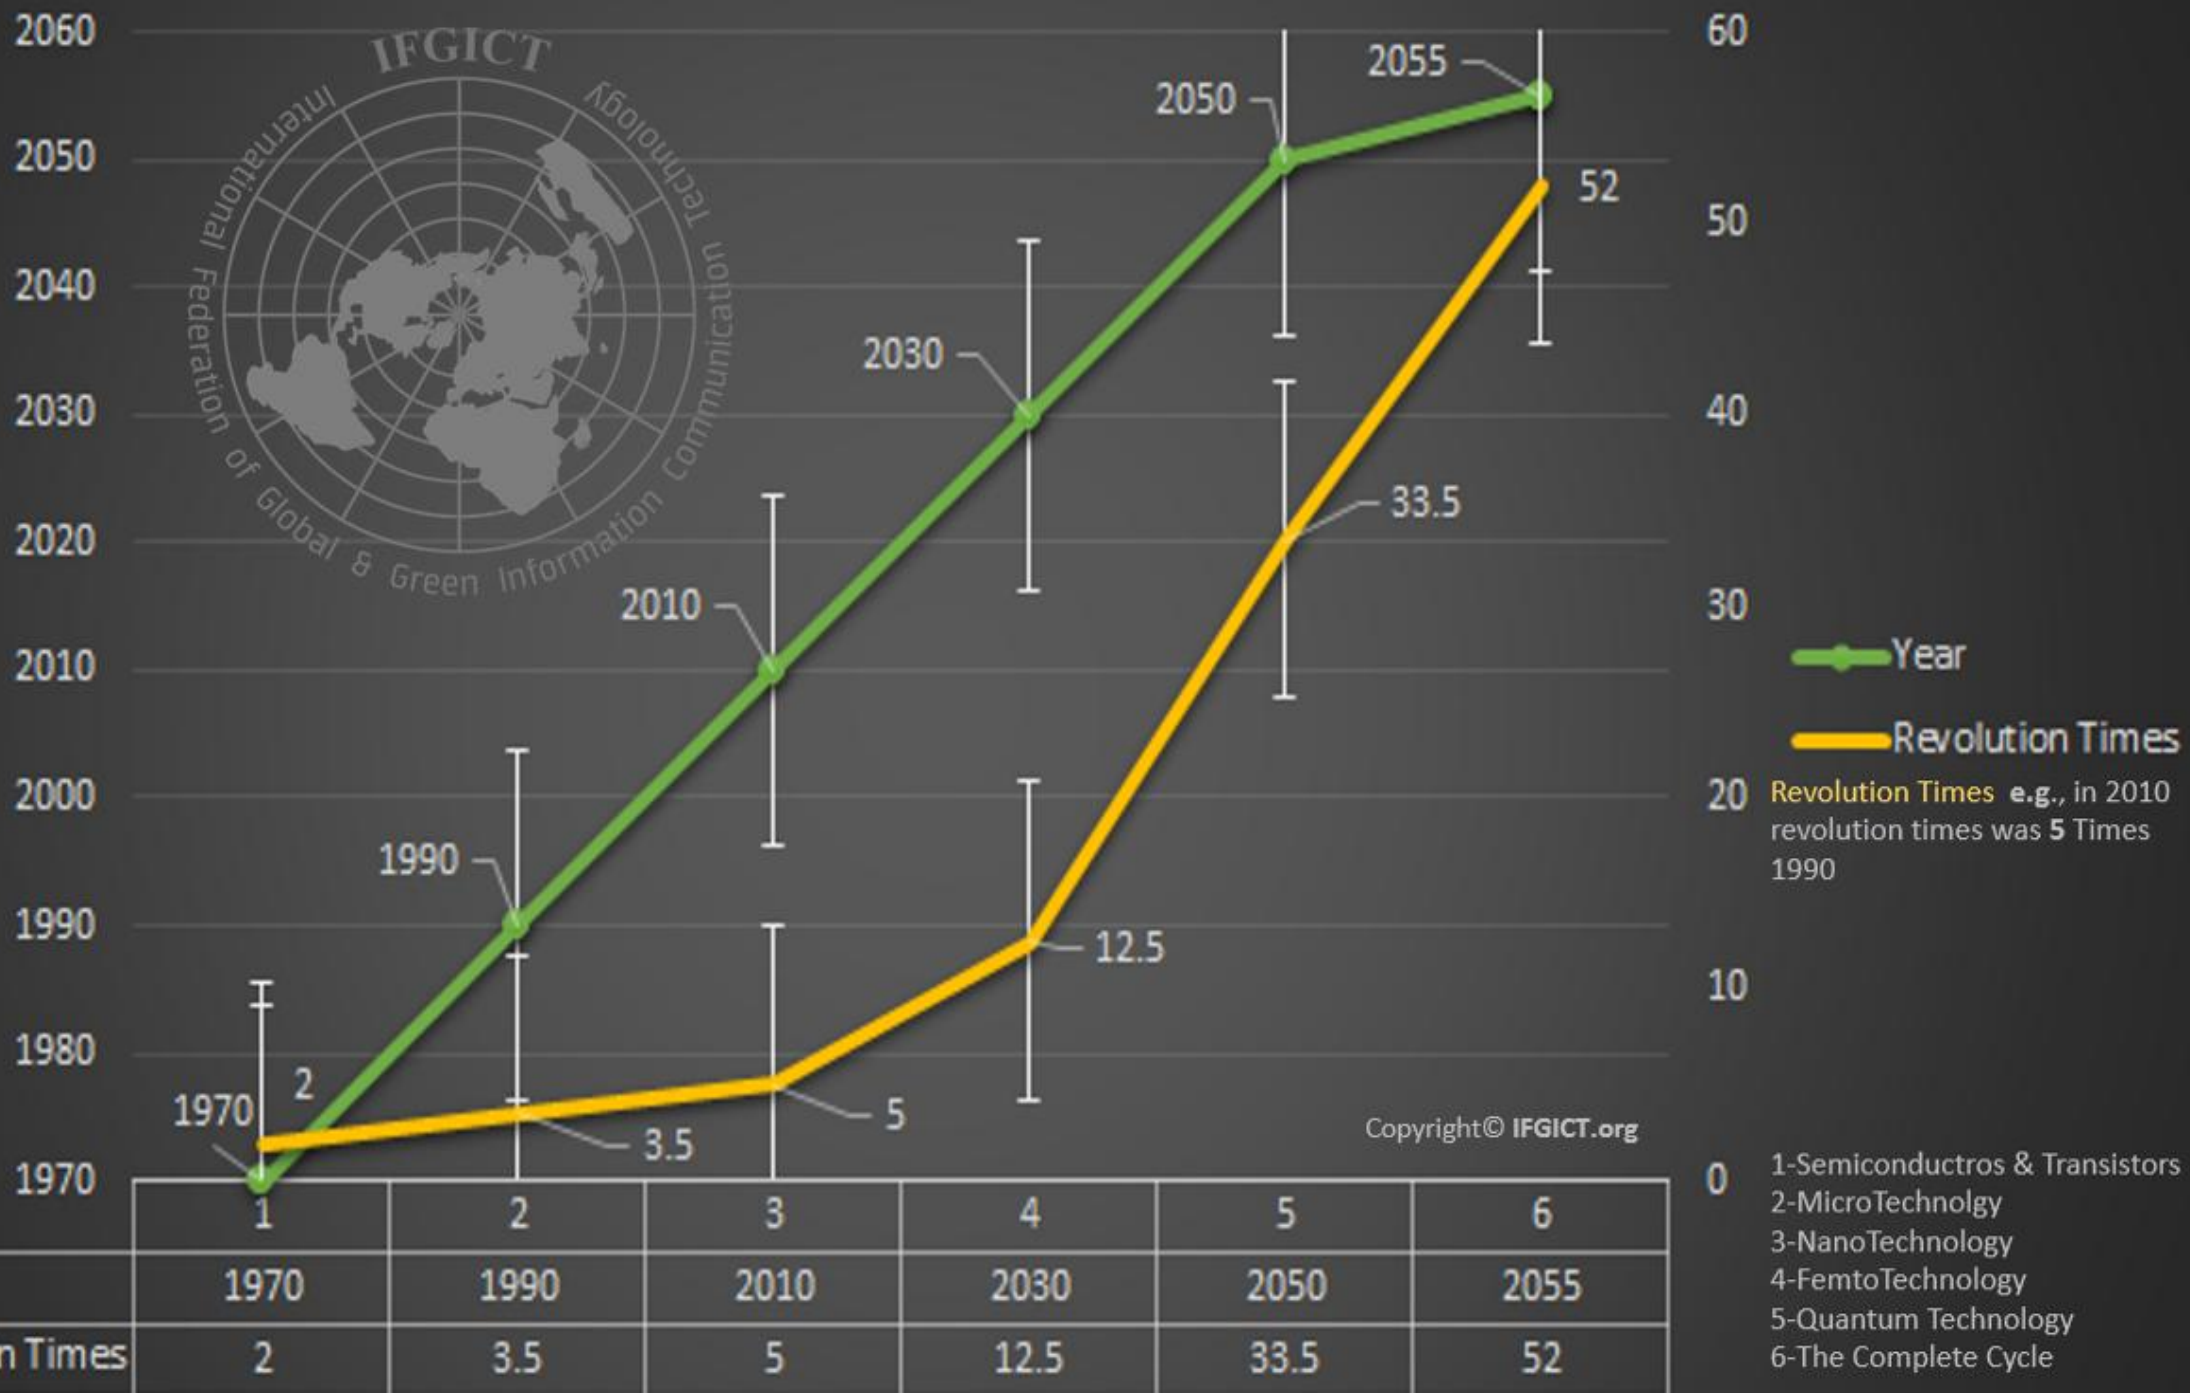

The Complete Cycle Ultra Super Tech “UST” Definition

The CIR Approach

- Everything is **C**onnected to Everything
- Everything is **I**ntegrated to Everything
- Everything is **R**eadable by Everything

ERA

Thank You
